

AKCELA NEXPLORE Cod. 1751

DESCRIPTION

Transmission oil for use on tractors, agricultural equipment and earth moving machinery. Suitable for use in traditional gearboxes, Power-Shift and Shuttle-Shift gearboxes, rear transmissions with wet brakes, side final drives, wheel final drives, differentials, hydraulic hoists, drive pulley, mechanical and hydrostatic drives, and power steering units.

CHARACTERISTICS

- Excellent anti-wear properties even in the most demanding and low RPM operating conditions.
- Excellent anti-stick & slip features in order to allow top braking efficiency.
- High viscosity index to optimize servo control response at any operating temperature.
- High lubricant thermal stability in order to maintain a high and constant pressure in the lubricating circuit.
- Improved fluidity at low temperatures to reduce power absorption and improve hydraulic circuit performance.

ADVICE ON USE

Thanks to its special formula, NEXPLORE can be used all year round.

For oil change intervals please comply with manufacturer's recommendations.
